NORMEDI – A HOLOGIC COMPANY

Normedi AB was founded in 2014 with a focus on offering sustainable medical technology solutions in gynecological surgery. We work to improve healthcare and create more opportunities for women to receive fast and effective treatment. We take responsibility for ensuring that our operations contribute to sustainable development – both by reducing our own environmental impact and by working together with our suppliers and customers to move the industry forward toward more sustainable solutions.

In 2022, Normedi was acquired by Hologic Inc. Hologic is governed by the Hologic Quality Management System, but Normedi operates as a stand alone company and follows its own quality principles.

NORMEDI'S QUALITY MANAGEMENT SYSTEM

Quality is important to our business because we value our customers, and we have been ISO 9001:2015 certified since 2016. We strive to provide our customers with products and services which meet and even exceed their expectations, while being perceived as a company that offers new and innovative products and solutions. We will be true to our slogan "Visible in Gynecology" by being truly visible within the gynecological field and by providing qualitative and competent service. At the same time, we will adhere to all legal requirements within the field and fulfill all the demands of our customers when it comes to products and their delivery.

We are committed to continuous improvement and have established a Quality Management System which provides a framework for measuring and improving our performance. This system is audited and evaluated on a regular basis to ensure that we are always on the forefront with regards to the products and services we provide.

OUR GOALS

Normedi strives to:

- Offer high-quality products and services with quick delivery and feedback
- Offer innovative products
- Be visible in gynecology, both through our products and by our physical presence
- Maintain a high degree of competence within the field of gynecology
- Strictly adhere to our Sales Process and maintain traceability throughout the process
